

APPLICATION DEVELOPMENT SERVICES

ASPEO knows how to help you achieve your business goals by building, integrating and supporting mission-critical applications for optimized quality, increased business value, faster time-to-market and reduced total costs.

Our Application Development Services provide analysis, design, development, testing, implementation and maintenance of business applications. ASPEO's delivery capability spans service-oriented architectures, including J2EE and .NET, as well as traditional client/server development.

With ASPEO, you will receive successful, high-quality applications without the hassles of learning curves and staffing. Our experts use a four-phased approach to define application requirements, analyze application characteristics, produce and implement the application and monitor performance during post-implementation. Our expert talent also gives you access to intellectual capital and best practices while reducing development costs.

RIGHTCHOICE™ PROJECT OUTSOURCING

With offices in the U.S. and Eastern Europe, ASPEO's global delivery model provides you with the flexibility to get any project completed—whether onsite, offsite, offshore or a combination—at the best possible value.

Our top-notch talent also gives you access to intellectual capital and best practices while reducing development costs.

DESIGNED TO WORK

From improving your IT capabilities to full-scale offshore software development, ASPEO's RightChoice™ Project Outsourcing process is built for success. Our process relies on a rapid application development methodology, mapping out the entire project before it begins and identifying goals, timelines and possible trouble spots before they happen. The process provides you with:

- **SCALABILITY**
Our vast pool of expert talent enables us to quickly scale to meet your project deadlines.
- **EXPERTISE**
Highly-skilled, experienced project managers, software developers, and IT consultants hit the ground running, employing best software practices to ensure quality and deliver immediate results.
- **TRANSPARENCY**
Regular updates keep you informed of our progress every step of the way and ensure a zero-defect solution perfectly matched to your needs.
- **CONTROL**
Whether you want to project manage yourself or hand it off to one of our experienced managers (or something in between), our methodology allows you to maintain complete control of your projects.

APPLICATION DEVELOPMENT SERVICES

TREMENDOUS SAVINGS WITHOUT SACRIFICING QUALITY

Outsourcing software development with ASPEO makes fiscal sense for large- and mid-sized companies. Our Eastern European production facility offers a vast pool of highly-educated, technical and functional experts in all current and legacy technologies. At the same time, our U.S. facility provides continuous updates, improved communication and a local presence ready to respond immediately to any request or change.

And with our adherence to software quality management (SQM) standards and software best practices, as well as our rigorous testing methodology, you can be sure that outsourcing your software development does not mean sacrificing quality.
